📍 Tervuren, Belgium [in roberto-paixao](#)

Education

Estacio de Sá, Software Development

Rio de Janeiro, Brazil
2012 – 2015

Software Engineer | Master of Business Administration (MBA), Software Development

Rio de Janeiro, Brazil
2016 – 2018

Experience

homeQgo, Software Development

Amsterdam, Netherlands

Advising on Customers sustainability goals and bridging the gap with installers

2022 – 2025

3 years

- ISO 27001 security engineering, implementing monitoring/logging controls, centralized Azure security findings in Datadog, and enforcing incident response, secret rotation, and network isolation
- Drove transition to an event-driven microservices architecture using Azure Service Bus, DDD, Rebus, AsyncAPI, and CloudEvents
- Owned observability strategy, defining SLIs/SLOs, improving OpenTelemetry tracing via custom .NET libraries, and refining alerts for reliability and signal quality

CarNext.com, Software Development

Amsterdam, Netherlands

Working as a software developer, helping Carnext to achieve its goal of changing the way consumers buy second-hand cars in Europe

2019 – 2022

3 years

- Using AWS capabilities such as RDS, EC2, S3 and SQS
- Implementing background process using commands and events on top of Rebus
- Actively working on defining architectural and design changes in the system.

Kwan, Software Development

Porto, Portugal

Working for Mindera on software improvements to Cascade's Human Resource System. The System is used by nearly 1000 clients of many sizes, from 25 to many thousands of employees.

2018 – 2019

1 year

- Implementing Event Sourcing architecture using RabbitMQ to integrate and decouple the system with third-party components.
- Implementing an authentication layer using IdentityServer to deliver the full potential of the OpenID Connect framework and enable SSO authentication across all Cascade subsystems.

Farfetch, Software Development

Porto, Portugal

Enabling the application to process all the payment requests, besides increasing the conversion rate for the Luxury Companies that rely on the Farfetch platform to sell.

2017 – 2018

1 year

Universidade Veiga de Almeida, Software Development

Rio de Janeiro, Brazil
